

Attachment A
To
Call2Recycle Vermont Primary Battery Stewardship Plan Agreement
Calculation of Individual Participant's Quarterly Payment Obligations
per Subsection 3(c)

Quarterly Payment Obligation Formula:

Quarterly Payment Obligation = (Base Price – Vermont Discounts) x (Your Primary Battery Sales into Vermont)

Definitions:

“Base Price” means the actual value of services provide by Call2Recycle in the prior quarter to collect in Vermont and reclaim primary batteries of each chemistry identified in Table 1 below, divided by the total number of grams of batteries of that chemistry collected by Call2Recycle in Vermont during that quarter.

“Vermont Discounts” means such savings as may be available to Call2Recycle by virtue of unique provisions of the state’s laws or implementing regulations. As of November 1, 2014, Call2Recycle has not identified any discounts that would be applicable in Vermont, but this term is included as a placeholder for future adjustments.

“Your Primary Battery Sales into Vermont” means the amount, in grams, that you report to Call2Recycle pursuant to Subparagraph 2(b)(iii) of the Agreement of which this Attachment A is a part.

Table 1

Battery Chemistry	Base Price
Alkaline / Carbon Zinc / Other Non-Lithium	\$0.0005 per gram
Lithium	\$0.004 per gram
